Aqua M200 Acoustic and Gas Above Ground Leak Detection

The Aqua M200 from FAST is a robust large screen readout geophone for zone location and pin-pointing water leakage detection.

The Aqua M200 is an above ground leak detection solution that provides a detailed professional methodology of zone location and pin-pointing water leaks. The Aqua M200 operates quickly and reliably to identify and locate water leaks. With numerous extensions that can be connected to locate leaks from valve to valve / chamber to chamber to pin-pointing location above ground.

The Aqua M200 can also be connected to an external accelerometer. The accelerometer can also be combined with a tripod. Other accessories include a test rod with extensions for point contact a Universal accelerometer with switch and a windproof ground microphone.

The Aqua M200 uses various measurement modes: Min / Mean / GTX / PWG. It uses professional sound quality due to 6 pre-set filters. The system has an internal rechargeable battery and comes with aa charger, headphones, and a transport case. The Aqua M200 has a large easy to read LCD display screen.
